

Features

- Virtually infinite electrical circuit isolation
- Metal or plastic shaft options
- DPST and DPDT switch options
- RoHS compliant*

Model 97 & 99 – 5/8 "Square Single-Turn Panel Control with Rotary Switch

Potentiometer Specifications						
Initial Electrical Characteristics ¹	Conductive Plastic Element	Cermet Element				
Standard Resistance Range						
	(B & E) 1 K ohms to 1 megohm					
Audio Tapers (C, D, F, G, S, & T)	(D,G,S, & T) 1 K ohms to 1 megohm	(C & F) 1 K ohms to 1 megohm				
	10 % or 20 %					
	±5 %					
	2 ohms maximum					
Effective Electrical Angle	(Linear tapers) 240 $^{\circ}$ ± 5 $^{\circ}$					
	(Audio tapers) 225 ° ± 5 °					
Contact Resistance Variation	±1 %	±1 % or 3 ohms (whichever is greater)				
Dielectric Withstanding Voltage (MIL-STD-20	02, Method 301)					
Sea Level	1,500 VAC minimum	1,500 VAC minimum				
70,000 Feet	500 VAC minimum	500 VAC minimum				
Insulation Resistance (500 VDC)	1,000 megohms minimum	1,000 megohms minimum				
Power Rating (Voltage Limited By Power Dis	ssipation or 350 VAC, Whichever Is Less)					
+70 °C Single Section Assembly	(Linear tapers) 1 watt	(Linear tapers) 2 watts				
	(Audio tapers) 0.5 watt	(Audio tapers) 1 watt				
+70 °C Multiple Section Assembly	(Linear tapers) 0.5 watt/section	(Linear tapers) 1 watt/section				
	(Audio tapers) 0.25 watt/section					
+125 °C	0 watt	0 watt				
Theoretical Resolution	Essentially infinite	Essentially infinite				
Environmental Characteristics ¹						
Operating Temperature Bange	40 °C to +125 °C	-40 °C to +125 °C				
	55 °C to +125 °C					
Temperature Coefficient Over Storage						
	±1,000 ppm/°C	±150 ppm/°C				
	15 G					
, ,	±2 % maximum					
	±5 % maximum					
	30 G					
	±2 % maximum					
	±5 % maximum					
	1,000 hours					
	±10 % maximum					
	100,000 cycles					
,	(Linear tapers) 10 ohms or ±15 % TRS max	, ,				
Total Florida Total Communication	(whichever is greater)	(/ iii taporo) 10 /o Trio max.				
	(Audio tapers) ±20 % maximum					
Contact Resistance Variation	(Madio taporo) ±20 /0 maximam					
@ 50 000 cycles	(Linear tapers) ±2 %	+2 %				
© 00,000 0y0100	(Audio tapers) ±3 %					
Moisture Resistance (MIL-STD-202, Method		20 /0				
	(Linear tapers) ±10 % TRS maximum	(All taners) +5 % TRS maximum				
rotar ricolotarioc Orint	(Audio tapers) ±20 % TRS maximum	(1 iii taporo) ±0 /0 1110 maximam				
Insulation Resistance (500 VDC)	100 megohms minimum	100 megohms minimum				
	IP 40					
II TIAIIIY	II TU	+0				

¹ Electrical specifications tested at 200 RPM, at room ambient: +25 °C nominal.

Model 97 & 99 – 5/8 "Square Single-Turn Panel Control with Rotary Switch

Potentiometer Specifications

Mechanical Characteristics ¹	
Stop Strength (1/4 " D shaft)(1/8 " D shaft)	
	300 ° ±5 °
Torque	
Starting	
Running Torque	
Single or Dual Section (A & R Bushings)	
Single or Dual Section (C & U Bushings)	
Mounting	
Variation	
Weight (Single Section, Metal Bushing)	12.7 grams nominal
(Each Additional Section)	4 grams nominal
Terminals	Printed circuit terminals, J-Hooks or solder lugs
Soldering Condition	Recommended hand soldering using Sn95/Ag5 no clean solder, 0.025 " wire diameter.
Maximum	temperature 399 °C (750 °F) for 3 seconds. No wash process to be used with no clean flux.
Marking	Manufacturer's trademark, date code, resistance, manufacturer's part number
Ganging (Multiple Section Potentiometers)	2 cups maximum
	sher and one mounting nut is shipped with each potentiometer (Bushing A: H-37-2 & H-38-2;
	Bushing C: H-37-1 & H-38-1; Bushing R: H-37-4 & H-38-9)

NOTE: Performance specifications do not apply to units subjected to printed circuit board cleaning procedures.

¹ Electrical specifications tested at 200 RPM, at room ambient: +25 °C nominal.

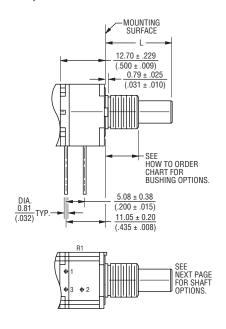

Rotary Switch Specifications	
Initial Electrical Characteristics ¹	
Contacts: DPST	•
DPDTPower Rating (Resistive Load):	,
DPST	1 A @ 125 volts RMS-60 Hz or 1 A @ 28 VDC
Contact Bounce	
Sea Level	
Environmental Characteristics ¹	
Operating Temperature Range Exposure Temperature Range Vibration (Dual Section) Contact Resistance Contact Bounce	-65 °C to +125 °C8 G
Shock (Dual Section) Contact Resistance Contact Bounce	10 milliohms maximum
Rotational Life	
Moisture Resistance (MIL-STD-202, Method 106, Condition B) Contact Resistance (0.1 VDC-10 mA)	
Insulation Resistance (After 24 Hours @ Room Temperature) (500 VDC) Housing Material	
Mechanical Characteristics ¹	
Actuating Torque (Each Section, Switch Module Only) Running Torque (Out of Detent, 2-4 Module Assembly). Detent Actuation Angle	
Contact Materials Terminal Styles Standard Orientation	Fine silver with gold overlaySolder lug only
Optional Terminal Strength (Before and After Soldering Heat Exposure)	Rotated 90 ° CCW from standard

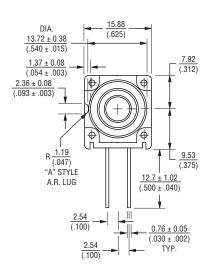

NOTE: Performance specifications do not apply to units subjected to printed circuit board cleaning procedures.

¹ Electrical specifications tested at 200 RPM, at room ambient: +25 °C nominal.

The products described herein and this document are subject to specific legal disclaimers as set forth on the last page of this document, and at www.bourns.com/docs/legal/disclaimer.pdf.

Legal Disclaimer Notice

This legal disclaimer applies to purchasers and users of Bourns® products manufactured by or on behalf of Bourns, Inc. and its affiliates (collectively, "Bourns").

Unless otherwise expressly indicated in writing, Bourns® products and data sheets relating thereto are subject to change without notice. Users should check for and obtain the latest relevant information and verify that such information is current and complete before placing orders for Bourns® products.

The characteristics and parameters of a Bourns® product set forth in its data sheet are based on laboratory conditions, and statements regarding the suitability of products for certain types of applications are based on Bourns' knowledge of typical requirements in generic applications. The characteristics and parameters of a Bourns® product in a user application may vary from the data sheet characteristics and parameters due to (i) the combination of the Bourns® product with other components in the user's application, or (ii) the environment of the user application itself. The characteristics and parameters of a Bourns® product also can and do vary in different applications and actual performance may vary over time. Users should always verify the actual performance of the Bourns® product in their specific devices and applications, and make their own independent judgments regarding the amount of additional test margin to design into their device or application to compensate for differences between laboratory and real world conditions.

Unless Bourns has explicitly designated an individual Bourns® product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949) or a particular qualification (e.g., UL listed or recognized), Bourns is not responsible for any failure of an individual Bourns® product to meet the requirements of such industry standard or particular qualification. Users of Bourns® products are responsible for ensuring compliance with safety-related requirements and standards applicable to their devices or applications.

Bourns® products are not recommended, authorized or intended for use in nuclear, lifesaving, life-critical or life-sustaining applications, nor in any other applications where failure or malfunction may result in personal injury, death, or severe property or environmental damage. Unless expressly and specifically approved in writing by two authorized Bourns representatives on a case-by-case basis, use of any Bourns® products in such unauthorized applications might not be safe and thus is at the user's sole risk. Life-critical applications include devices identified by the U.S. Food and Drug Administration as Class III devices and generally equivalent classifications outside of the United States.

Bourns expressly identifies those Bourns® standard products that are suitable for use in automotive applications on such products' data sheets in the section entitled "Applications." Unless expressly and specifically approved in writing by two authorized Bourns representatives on a case-by-case basis, use of any other Bourns® standard products in an automotive application might not be safe and thus is not recommended, authorized or intended and is at the user's sole risk. If Bourns expressly identifies a sub-category of automotive application in the data sheet for its standard products (such as infotainment or lighting), such identification means that Bourns has reviewed its standard product and has determined that if such Bourns® standard product is considered for potential use in automotive applications, it should only be used in such sub-category of automotive applications. Any reference to Bourns® standard product in the data sheet as compliant with the AEC-Q standard or "automotive grade" does not by itself mean that Bourns has approved such product for use in an automotive application.

Bourns® standard products are not tested to comply with United States Federal Aviation Administration standards generally or any other generally equivalent governmental organization standard applicable to products designed or manufactured for use in aircraft or space applications. Bourns expressly identifies Bourns® standard products that are suitable for use in aircraft or space applications on such products' data sheets in the section entitled "Applications." Unless expressly and specifically approved in writing by two authorized Bourns representatives on a case-by-case basis, use of any other Bourns® standard product in an aircraft or space application might not be safe and thus is not recommended, authorized or intended and is at the user's sole risk.

The use and level of testing applicable to Bourns® custom products shall be negotiated on a case-by-case basis by Bourns and the user for which such Bourns® custom products are specially designed. Absent a written agreement between Bourns and the user regarding the use and level of such testing, the above provisions applicable to Bourns® standard products shall also apply to such Bourns® custom products.

Users shall not sell, transfer, export or re-export any Bourns® products or technology for use in activities which involve the design, development, production, use or stockpiling of nuclear, chemical or biological weapons or missiles, nor shall they use Bourns® products or technology in any facility which engages in activities relating to such devices. The foregoing restrictions apply to all uses and applications that violate national or international prohibitions, including embargos or international regulations. Further, Bourns® products and Bourns technology and technical data may not under any circumstance be exported or re-exported to countries subject to international sanctions or embargoes. Bourns® products may not, without prior authorization from Bourns and/or the U.S. Government, be resold, transferred, or re-exported to any party not eligible to receive U.S. commodities, software, and technical data.

To the maximum extent permitted by applicable law, Bourns disclaims (i) any and all liability for special, punitive, consequential, incidental or indirect damages or lost revenues or lost profits, and (ii) any and all implied warranties, including implied warranties of fitness for particular purpose, non-infringement and merchantability.
