## Temperature Re-rating Curve

**Note:**  
Derating depicted in this curve is in addition to the standard derating of 25% for continuous operation.

## Average Time Current Curves

**Note:**  
For 50 A rating, it may not break current consistently when overload current is less than 200% I<sub>n</sub> (represented by dotted portion of this Time Current Curve), as may be arc current continuously pass through fuse under this condition. Do not recommend to use conditions of below 200% I<sub>n</sub> overload.
